Step 2: Understanding How To Use Your Product

To make you more confident with your decision I want to assure you that the goals of The Wing Girl Method and myself are entirely pure, genuine and authentic. My goal is to inform you of how women REALLY think and feel about all topics surrounding approaching, dating, attracting, seducing, relationships, marriage, divorce etc. I want to provide you with an honest look inside a woman's mind.

This program was created over a span of 6 years of interviews and research on What Women REALLY Want from men. I have talked to thousands of women of all ages and races and got them to admit to me What Women REALLY Want From Men. I made sure they did not give me the "friendly" or "nice" answers. With a little help and pushing from me, they gave me the REAL answers that you need to finally hear.

One thing I want you to understand about this program is that it is very REAL. At times it does not show the pretty side to women.

This program is NOT going to show you how women SHOULD act. Meaning giving men tons of chances, being completely open, having no boundaries etc.

It's going to show you how they DO act so that you can be prepared and armed when going into battle ;-) so that when women act like typical women, you are not nervous/anxious/frustrated/surprised/angered. Instead you can remain calm, stable and strong. This will show women that you are a man they want to be with!

Here is a huge insight into women that will assist you along the way through the material.

Secret About Women They Will Never Tell You

Many women do not know what they want. They know what they THINK they want and are looking for direction.

Women are prisoners to the belief that they have to be perfect. Women are always attempting to be #1, the best, and the most special. Which means that at times they suppress their real thoughts and wants in order to keep up appearances. For women, and for you, this is very frustrating because this usually results in mixed messages and confusing communication.

Pay attention to how women behave during interviews with me. Usually in the first portion of the audio they make sure to present their "ideal" side rather than their real side. As time goes on and I gain their trust, they open up to me and say what they are really thinking. Once a woman realizes she is in a safe place and her real desires will not be used against her, she will allow her "real" self to come out.

Lesson To You: Make a woman feel safe, understood and accepted when stating her needs and she will be yours forever. Make her feel ashamed/crazy/irrational and you will feel the fury time and time again. Being a leader instead of a follower will also get you attention, admiration and attraction from women.

What I want you to gain from this program is insight into the way that women think, behave and FEEL. Because the more you understand about women, the more equipped you will be to handle them with ease in the real world.

Step 3: Downloading Your Audio's & Video's

As I said above, the materials in this program have been organized into 6 categories comprised of audio and/or video. Each category is on it's own page and is available for download.

Note: We offer several formats for both audio and video download.

Video: FLV, MP4 and .MOV

Audio: .MP3

Download your audio by clicking on the download links. In most browsers the download will begin automatically. Some browsers may behave differently, find your browser in the list below for specific instructions:

1. Microsoft Internet Explorer: A window will open that will ask if you want to "Open" or "Save" the file. Select "Save" and in the new window that opens, select your Desktop and then hit "OK."
2. Mozilla Firefox: A window will open that will ask if you want to "Open with" or "Save File". Select "Save" and the file will begin downloading automatically to your downloads folder.
3. Safari: The file will automatically start downloading and the downloads window will open up and show the progress. If you do not see the downloads window, select "Window" and then "Downloads" from the menu, and the download window will open.

4. Google Chrome: The file will automatically start downloading and a progress window will appear along the bottom of the browser.

For Firefox, Safari, and Google Chrome users, to add these files to your iTunes, just click on the file in the downloads window after it has finished downloading. iTunes will open and the file will automatically be added to your library.

For Internet Explorer users, all you need to do is navigate to your desktop, and double click on each file, for example "badboyvsniceguy.mp3". iTunes will open and the file will automatically be added to your library.

Alternatively you can also do the following:

1. Open iTunes. While in iTunes select "File" and then "Add To Library" to add the audio to your library.

2. Find the file you just saved on your desktop, it will be called "badboyvsniceguy.mp3" and select "Choose"

3. The audio will be imported into your music library, and next time you synch your iPod you'll have this track on your device so you can listen to it on the go!

Mobile Devices:

Many of the audio files are delivered in the compressed ZIP format to speed the download process. Saving these files to your computer and then uncompressing them will give you the MP3 formatted file that is needed to add them to your iTunes system.

Once the MP3s have been added to the library you can add them to a playlist and transfer them over to your mobile device.

Here is a more detailed explanation of the process
